## The Platinum Range - Woven Antron fibre carpets

### WOVEN ANTRON FOR THE DESIGNER

- Woven Antron (Sisal style designs) with Teflon fabric protection
- Can be created as custom-made floor rugs
- Four designs, great contemporary colours available in 50 + colour ways
- 4.0mtrs wide

### WOVEN ANTRON FOR CONTRACT/ COMMERCIAL WEAR

- The patented hollow filament construction of the fibre, with precisely placed interior channels running along its length, minimise the visual effects of soiling and staining without compromising wear performance
- Antron Nylon 6.6 fibres offer a harder, denser and more resilient fibre structure than ordinary type 6 nylon because of their tighter molecular structure. The result being the carpets are more resistant to matting, crushing, fuzzing, staining and burning.
- Antron fibres are engineered to minimise soil-trapping crevices and are protected with patented DuPont™ Teflon® soil resistance technology.
- Anti static. Antron fibres feature built-in antistatic protection to minimise shock.
- Extreme heavy duty use wear rated – contract / commercial, health care and hospitality.
- Also suitable for residential use.
- Fire Rated for ALL classes of buildings (2 – 9c) and Fire Isolated exits. CRF mean of 5.5 kw/m<sup>2</sup> and smoke value mean of 141%

WOVEN ANTRON FOR THE DESIGNER AND THE ENVIRONMENT

ONLY AT INTERNATIONAL FLOORCOVERINGS

# The Platinum Range - continued

## WOVEN ANTRON FOR THE ENVIRONMENT

- Antron Excel Certified by Scientific Certification System as an Environmentally Preferred Product, also CRI Green Label Plus (USA) GLP 7478 for indoor air quality with VOC's of less than 0.5mg/sq hr

- Antron Excel fibre – renewable resource
- Antron fibre is also available with high recycled content nylon on a special order basis. The fibre is certified by SCS as containing at least 90% post-industrial recycled content nylon.

- "Environmentally Preferable" – These words were first outlined by the President of the USA, in September, 1998, by Executive Order 13101, which directs Executive agencies to identify and purchase Environmentally Preferred products. Since that time, reputable third party organisations, including Scientific Certification Systems (SCS) have certified hundreds of environmental product claims. But Antron carpet fibre is one of the first manufactured products to receive third party certification as an Environmentally Preferable Product.
